Headline News – Giant Crane Finishes Job at High Tech Factory

By “Free Press” October 20, 2011

The Mammoth Crane Integral to Building Intel's Multi-Billion-Dollar Chip Manufacturing Plant is On to the Next Project.

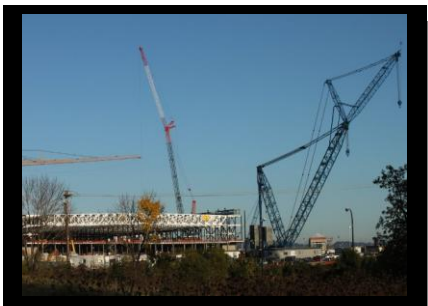

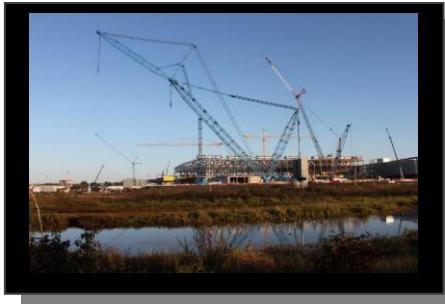

The world's largest land-based mobile crane has finished the heavy lifting at Intel's massive construction site in Hillsboro, Ore.

The Lampson International LTL-2600 Transi-Lift, billed as the largest mobile construction crane in the world, has been on site for several weeks installing giant roof trusses on D1X, Intel's multi-billion-dollar factory currently under construction here.

Kate Lampson, director of public affairs and marketing for Lampson International, said the crane's job at D1X wrapped up this week and workers have already begun dismantling it in preparation for shipment and transport to its next job, which may be in Norway, she said.

The construction is part of a massive investment in U.S. manufacturing that Intel announced in October of last year, and again in February of this year. Overall, the company is spending between \$6 billion and \$8 billion to expand U.S. manufacturing including D1X, while upgrading existing facilities in Oregon and Arizona. Another new \$5 billion factory in Arizona was announced in February, and construction is now underway.

When President Barack Obama visited an Oregon factory earlier this year, Intel President and CEO Paul Otellini said the D1X project would generate 3,000 construction jobs over 2 years and require 19,000 tons of steel, 13,000 truckloads of cement and more than 40 miles of pipe before it was done. When finished, the clean room alone -- the main floor where silicon development and manufacturing is done -- will be the size of four football fields, according to Otellini. Otellini said D1X is scheduled for start-up in 2013 and will be the first 14nm microprocessor manufacturing facility in the world.

Lampson Tidbits – Lampson International Inc. named Manufacturer of the Year at Smartmap

By Mary Hopkin - "Tri-Cities Area Journal of Business" October 2011

Lampson International earned the top honour at the 2011 Smartmap Expo, being named Manufacturer of the Year during the Expo's sports bar-theme networking event.

Neil F. Lampson founded the company in 1946. At the time, it had just two employees. Now the company has 275 employees in the U.S. & Canada.

The company was nominated for the honour by the Port of Pasco. "Lampson is a company that proves that anything can be accomplished with vision, energy and employees," said the Port's nomination form. "They lead the world with innovative manufacturing designs that take into account the needs of the industry. They are also continually building upon their current designs to create safer and more efficient models that have become known and widely used through the world."

More than 450 people attend the event, which is organized by the Tri-City Development Council and sponsored by Gesa Credit Union.

The Gesa Smartmap Expo started Sept. 28 with a tour of TiLite followed by a reception for sponsors and exhibitors.

United Way Annual Campaign 2011

September kicked off the start of the United Way of Benton and Franklin Counties Annual Campaign. Every year Lampson International does its best to give back to the community that continues to support it. One such way is through the annual United Way Charitable Gift Giving Campaign. For the past sixteen years, Lampson's employees have generously contributed to the Tri-City community through a donation of their wages. It is through this type of gift giving that many families and charities in our area are able to enjoy services that they otherwise could not afford.

Lampson Holiday Party 2011

Last year's company Christmas party was held on Saturday December 10th at the Clover Island Inn in Kennewick. We had a record number of 225 people in attendance that ate, drank and danced the night away. A special thank you goes out to everyone for making the effort to be there and make this another special company event!

33rd Annual Lampson Cable Bridge Run 2011

December, 2011 marked the 33rd annual Lampson Cable Bridge Run. This is a popular foot race for local residents who wish to maintain a level of fitness during the cold Tri-City winters. The race offers a 5k and 10K course as well as a one mile fun run. Despite the snow and cold weather, thousands of Tri-Citians came out and ran the race. A special thank you goes out to the Lampson volunteers who continue to make this event a success!

PowerGen 2011

From December 13-15, 2011 the PowerGen International show was held in Las Vegas, NV and Lampson International was there to exhibit our products and services. PowerGen International is a platform for new product launches and an opportunity for exhibitors to showcase their products and services. Items such as boiler water and feed water treatment services, computer hardware and software, controls and instrumentation systems and engineering and construction services, are all on display. With over 20,000 attendees from 92 countries and 1,200 exhibitors, PowerGen International is the world's largest industry exhibit floor.

Safety –

By Bruce Stemp

First everyone should be congratulated for a significant reduction in both recordable and total injuries and incidents during the previous year. The 50% reduction we saw in recordable injuries bodes very well for our injury rates, which are used as a qualifier for many projects. The reduction bears considerable significance since there was not a corresponding huge reduction in our work hours. That translates to all of you working basically the same hours and doing it almost twice as safe as in 2010. Good Job!

What can we do to continue this trend? There are many things that can be done, but for this issue I want to focus on prevention and quick care of what may be considered minor or inconsequential injuries.

Prevention can be as simple as taking a little time to assess the hazards we are being exposed to and using proper planning and procedures to eliminate or minimize our exposure. It can be as easy as being diligent in the wearing of our PPE and making sure it is properly maintained and adequate for the job. Communications between supervisors and employees and also from employee to employee reminding each to follow the rules can go a long ways in keeping all of us safe.

If we do get injured, no matter how minor, we need to make sure we get proper first aid care and that we continue with it until any danger of exacerbating the injury has passed. We need to use common sense approaches to when we should seek more professional advice or when self-provided measures will be sufficient. Having a professional assess the injury is far less of an inconvenience than developing an infection or something worse.

To go along with the proper care we need to fill out the proper paperwork to document the injury or incident. This allows the safety department to categorize the injuries, locations, and exposures so that we can look for trends that may indicate a lack of proper PPE, a required change in procedure, or additional training to minimize the hazard. This paperwork needs to be completed as soon as possible following the incident and forwarded to the safety department. This allows us to be better informed of the causes of injuries, the actual diagnosis - if professional help is required, any restrictions placed on the worker upon his return to work, and ways to get an injured worker back to safe, gainful works as soon as possible.

Once again thank you for your efforts in regards to safe work last year and lets all do our best to continue to improve the program in the upcoming year.

Announcements

Birthday's: Happy Birthday to the following Lampson employees!!!

September:

Tom Cave, Frankie Connell, Tony Cornwell, Herb Coulter, Shawn Dixon, Shauna George, Bob Stork, Austin Carver, William Hall, Josh Hoover, Troy Johnson, Travis Jordan, Jim La Rowe, Fred Lewis, Esteban Lopez, Lance Malek, Terence Myers, Chris Silvers, Chase Stemp, Tom Strycula, Lukas Talcott, Nathan Boyd, John O'Donnell, Ranka Knezevic, George Griffiths, Glenn Wilmott, Paul Philip, Patrick Codd, Vicki Wilson, Timothy Watkins

October:

Ryan Cooper, Wes Goenen, Bill Haywood, Pat Mansfield, Tom Sanders, Randy Speer, Bruce Stemp, Cory Stemp, Alan Hayden, David Heiman, Tanner Hickman, Tony Orozco, Joel Raplee, Travis Sharp, Taylor Vorheis, Earnest Yanoff, Brian Holm, Dave Sutcliffe, John Cole, Lambertus Jansen, Norman Nightingale, Wayne Cooper, Ty Connolly, Tony Jurd

November:

Jeff Abersfeller, Deanna Brooks, Bob Burke, Kathleen Hurt, Kate Lampson, John Rieker, Lana Laughlin, Hector Cardenas, Robert Carson, Don Christian, Ryan Foeppe, Butch Forbis, Brian Foster, Jerry Fuller, Roger Hoover, Viktor Ryadinskiy, Nate Sather, Gene Russell, Gary Appel, Charles Reitz, Lou Kenworthy, Michael Hulls, Daniel Beiers, Jason Chapman, Henry Stewart, Lindsay Watkins

December:

Michael Alloway, Eric Carlson, Rene Hernandez, Mary Lampson, Bill Lampson, Lance Wagner, Lisa Welter, David Barnes, Clyde Goeke, Bud Huntley, Eric Kuh, George Perez, Michael Rabbett, Steve Robbins, Nicholas Schaffer, Josh Stading, Glen Talcott, Lee Fischer, Kaylene Walter, Pat Rolt, John Lee, Dennis Thorburn, Kerry O'Brien, Ray Parker

Engagements: In December of 2011 Shauna George and Cody Hoburg were engaged. The wedding is set for August 2012 and the happy couple are excitedly planning their big day. Congratulations you two!!

On April 16th of 2011 Patrick Mansfield proposed to Alyson Rowe. Their wedding is set for May 2012 and the happy couple are busy making the arrangements. Congratulations to the both of you!

Births: We would like to congratulate Jackie and Nate DeBord on the arrival of their son Trypp Anthony DeBord. Trypp was born on Friday March 30, 2012 and mom and son are both doing great. Congratulations to both the DeBord and Cornwell families!
